

App Request - EWB

Idea:

We want this app to be one location for any information students normally want to find. Most information already exists for us so we just have to pull it together.

Desired Features:

1. View PODS availability
 - o PODS Schedule: <http://www.binghamton.edu/its/facilities/pods/schedule.html>
 - o PODS availability: <https://its.binghamton.edu/its/facilities/pods/livemaps>
2. Add money to meal-plan
 - o Quick add Value: https://bing.campuscardcenter.com/ch/quick_revalue.html
3. View parking availability
 - o This data doesn't exist yet.
4. See where you can legally park and when
 - o Filter by permit status, time, and lot
 - o Parking map: <https://www.binghamton.edu/parking-services/parking-map.html>
5. Map of school
 - o Map: <http://www.binghamton.edu/maps/>
6. Map of Bike racks and covered bike racks
 - o Bike Share has this
7. Course data-base
 - o BU Brain. This will probably need school's permission
8. Links to all departments
 - o Available on Binghamton website
9. Link to Blackboard
10. Link to BU Brain
11. Link to B-mail
12. Link to Pipe Dream
13. Link to B-engaged
14. Link to B-line

Stage 1 – Quick Prototype

- Make a quick website with links to all of these things that already exist.

Stage 2

- Get CS people to make an app with these things

Stage 3

- Work with the school (library, Sodexo, parking) to start having the data available THROUGH the app, without an external link

Name Ideas?
